NAME

curl_easy_reset - reset all options of a libcurl session handle

SYNOPSIS

#include <curl/curl.h>

void curl_easy_reset(CURL *handle**);**

DESCRIPTION

Re-initializes all options previously set on a specified CURL handle to the default values. This puts back the handle to the same state as it was in when it was just created with *curl_easy_init(3)*.

It does not change the following information kept in the handle: live connections, the Session ID cache, the DNS cache, the cookies and shares.

This function was added in libcurl 7.12.1.

RETURN VALUE

Nothing
